 - (ii) the use of the apparatus has caused or is causing undue interference with any other radio communication apparatus in circumstances where all reasonable steps to minimise interference have been taken in relation to the situation or apparatus receiving such radio communication,

it may serve on the person in whose possession the apparatus is, a notice in writing requiring that, after a date fixed by the notice, not being less than thirty days from the date of service thereof, the apparatus shall not be used, whether by the person to whom the notice is given or otherwise, or shall only be used in such manner, at such times and in such circumstances as may be specified in the notice:

Provided that if the Commission is satisfied that the use of the apparatus in question is likely to cause undue interference with any radio communication used for the purpose of any safety-of-life service or for any purpose on which the safety of any person or of any vessel, aircraft or vehicle may depend, the date to be fixed by the notice may be the date of the service thereof.

(2) A notice under subsection (1) may be revoked or varied by a subsequent notice in writing by the Commission, served on the person in whose possession the apparatus then is:

Provided that where a notice under this section has the effect of imposing any additional restrictions on the use of the apparatus, the provisions of

subsection (1) relating to the coming into force of the notice shall apply in relation to the subsequent notice as if it had been a notice served under subsection (1).

(3) Where a notice has been given under subsection (1), any person having possession of, or any interest in, the apparatus to which the notice relates may, at any time whether before or after the date fixed by such notice, by notice in writing served on the Commission, show reasons why the apparatus in question complies with the requirements applicable to it under the regulations and if the Commission is satisfied that—

- (a) the apparatus in question so complies, it shall revoke the notice; or
- (b) the said requirements ought to be relaxed in relation to the apparatus, may revoke the notice or vary it in such manner as the Commission may deem fit:

(4) A revocation or variation made under subsection (2) or (3) may be absolute or may be conditional on such steps being taken in relation to the apparatus or on the apparatus being made to comply with such requirements as may be specified in the direction and any questions as to whether or not the apparatus has been made to comply with the requirements shall, on the application of the Director-General or of any person having possession of or any interest in the apparatus, be determined by the Tribunal.

(5) Any person who, knowing that a notice of the Commission under this section is in force with respect to any apparatus, uses such apparatus, or causes or permits it to be used in contravention of the notice, commits an offence and shall be liable on conviction to a fine not exceeding five hundred thousand shillings, or to imprisonment for a term not exceeding three years, or to both.

- (b) any radio communication apparatus which, if fully assembled and in working order, would be a radio communication station, shall not, unless completely dismantled, cease to be a radio communication station by reason of the fact that it is temporarily incapable of transmitting or receiving electromagnetic waves owing to a defect or absence of some part.

43. Enforcement of regulations as to sales, etc., by manufacturers and others

(1) If the Commission is of the opinion that any radio communication apparatus does not comply with the requirements applicable to it under

regulations made under section 40, the Commission may serve on any person who has manufactured, assembled or imported such apparatus in the course of business, a notice in writing prohibiting him from selling that apparatus or offering or advertising it for sale or letting it on hire or offering or advertising it for letting on hire.

- (b) otherwise than under the authority of the Minister for the time being responsible for internal security—
 - (i) uses any radio communication apparatus with intent to obtain information as to the contents, sender or addressee of any message, (whether sent by means of radio communication or not) which neither the person using the station or apparatus nor any person on whose behalf he is acting is authorised to receive; or
 - (ii) except in the course of legal proceedings or for the purposes of any report thereon, discloses any information as to the contents, sender or addressee of any such message, being information which would not have come to his knowledge but for the use of the radio communication station or radio communication apparatus by him or by any other person acting on his behalf,

SECOND SCHEDULE—continued

13. Alarm systems—

The basic charge for each alarm unit is K.Sh. 1250, but the specific charges for each particular customer will be determined by the applicable charge grouping.

14. **Broadcasting stations & fixed satellite earth stations**

The fee payable for broadcasting stations and fixed satellite earth stations is commensurate with the power and the occupied bandwidth and calculated on the basis of these parameters using the following formula—

Fees per transmitter or carrier in Kenya shillings is:

$$= K_1 \log_{10} \left(\frac{P_{nom} \text{ (watts)}}{25 \text{ watts}} + K_2 \log_{10} \left(\frac{P_{tot} - 1000}{25 \text{ watts}} \right) \right) \times \left(\frac{BW \text{ (kHz)}}{8.5 \text{ kHz}} \right) \times 574.10$$

Where—

- (a) $K_1 = 1$ for the first 1 kW of radiated carrier power
- (b) $K_2 = 0.2$ for additional power above 1 kW.
- (c) **25 watts** is the maximum power allowable for VHF base stations.
- (d) **8.5 kHz** is maximum allowable RF bandwidth for VHF base stations.
- (e) P_{nom} is the nominal transmitter power.
- (f) P_{tot} is the effective isotropically radiated power
- (g) **Bandwidth** is the width, of frequency band that is just sufficient to ensure the transmission of information at a rate and with the quality acceptable under specific conditions.

15. **Terrestrial Links (Fixed Station Licence)**

A licence to establish a radio communication station at a fixed location for carrying on a Fixed Radio Communication Service to provide a public service.

This category of licence is drawn for radio stations used to interconnect two specified fixed points.

The fee payable for this licence is based on the occupied bandwidth, and is calculated using the following formula—

The fee. F (KShs) per transmitter per location is—

$$F \text{ (KShs)} = \left(\frac{RF \text{ Bandwidth (kHz)}}{8.5 \text{ kHz}} \right) \times \left(\frac{\text{Number of}}{RF \text{ channels}} \right) \times K1 \times \text{Unit fee}$$

Where, unit fee = 574.10, as KShs. 574.10 is the unit spectrum fee for a 8.5kHz band.

- $K1 = 0.6$ for frequency band < 1700 MHz
- $= 0.5$ for frequency band 1700 to 10000 MHz
- $= 0.4$ for frequency band > 10000 MHz.

Where **RF** means Radio Frequency, and other parameters are as defined above.

Transmitter shall include terminal and repeater stations.

The formula is applicable to point-to-point links, microwave radio relay equipment, studio-to-transmitter links, etc.

16. Cellular Networks and Fixed Wireless Access Networks

Licence to establish a fixed radio station to operate a mobile cellular radio service and fixed wireless access.

$$\text{Fee } F \text{ (K.Sh)} = \frac{2 \times RF \text{ Bandwidth (kHz)}}{8.5 \text{ kHz}} \times (\text{number of cell sites}) \times 1043.65$$

The parameters are as defined above.

SECOND SCHEDULE—continued

17. Trunked Network (Mobile Trunked Radio Licence)
A licence to operate a private trunked radio network.
The fee, F per transmitter per location is—

$$F \text{ (KShs)} = \left(\frac{\text{RF Bandwidth (kHz)}}{8.5 \text{ kHz}} \right) \times (\text{number of cell sites}) \times 574.10$$

The parameters are as defined above.

18. Alarm Systems
The basic charge for each alarm unit is KShs 1250, where the specific charges for each particular customer will be determined by the applicable charge grouping
19. Single channel radios
The fee F per transmitter per location is;

$$F \text{ (KSh)} = \left(\frac{\text{RF Bandwidth (kHz)}}{8.5 \text{ kHz}} \right) \times 1043.65$$

20. The Commission is not bound to use any or all of the above formulas if in its opinion the service involved requires technical or other considerations. Spectrum fees for radio equipment not covered in the above schedule shall be determined at the time of application.
